Quiz 18.1E

Assume the three charges below are fixed in place.

- a) Find the magnitude and direction of the electric field (due to charges q2 and q3) in which charge q1 is immersed.
- b) Assume now q1 is free to move and has a mass of 37.0 grams. What is the magnitude and direction of the acceleration of q1?

$$q_{3}=3.22 \mu C$$

$$Q_{3}=\sqrt{53^{2}+15^{2}}=38.10m$$

$$Q_{2}=245 \mu C$$
